

HYDROK

PRODUCTS

Channel Cleaner

A self-adjusting Brush System for cleaning the launder channel, Spill Weir and ScumBoard in circular final settlement tanks.

Lifting gear

Hydrok can provide lift arrangement for all products that are installed below ground to eliminate the need for man entry during planned maintenance.

Safety nets

Hydrok can provide safety nets to protect open access points above screens.

Screening Retention

Screening retention systems are available to remove screenings. These may be bags or wire arrangements.

Surveys

Our fully trained engineers are available to carry out structural and mechanical surveys to existing chambers and Installations.

Installations

We employ our own skilled engineers to install our Products.

Should this service not be required our products are always supplied with full installation instructions.
